## **A Natural Flea, Fly & Tick Repellent**

- Ingredients:** 1 cup Avon Skin So Soft  
2 cups white vinegar  
1-3 cups water  
1 tablespoon Eucalyptus or Citronella oil (available at most health food stores).
- Mix & Apply:** Combine ingredients and put in trigger spray bottle. Shake well before each use. Spray a light mist over your dog - a little goes a long way. Avoid nose and eyes.
- Recommendations:** The weaker mixture (3 cups water) works with flies and mosquitoes. The stronger mix (1 cup water) is for when your dog is in tick infested areas. However, it is not guaranteed to prevent ticks -- be sure you take other precautions, and check your dog thoroughly when you get home.
- Caution:** Rarely a dog may be sensitive to this recipe. We once had a student who used the entire recipe at once and her dog had a reaction. Obviously, this overkill is not recommended or necessary, but if your dog does have a reaction, bathe him and do not use it again. Not recommended for other species such as cats or rabbits. Check with your veterinarian if you have concerns or questions.
